

THE WORKFORCE NETWORK™

Contact Center and Enterprise
Workforce Management Solutions

CORE COMPETENCIES

Pipkins, Inc. is a leading supplier of Enterprise Workforce Management (WFM) Solutions for the Contact Center Industry. Founded in 1983 with a specific focus on WFM, we are a privately-held, American-owned company headquartered in the Greater St. Louis area in Chesterfield, Missouri.

- Forecasting, scheduling, real-time adherence and vacation planning
- Performance management
- Hosted, premise-based and mobile WFM
- Solutions to effectively manage at-home agents, back office and off site staff
- Time & attendance tracking, task tracking, and compliance monitoring
- Mentoring and collaboration tools

INTRODUCTION

From Dr. James Pipkins

For more than 35 years, Pipkins has created and delivered superior workforce management solutions for contact centers of all sizes, including 13 industry-first applications. Not content to rest on our laurels, our team at Pipkins continues to develop new applications and enhancements to provide contact center managers with the tools necessary to improve the efficiency and effectiveness of their teams and their systems, and keep pace with today's complex, ever-evolving, multichannel and omnichannel contact center environments and back office operations.

The secret to our success?

Our systems produce positive, measurable results in terms of cost savings and increased productivity that improve your profit margin and bottom line:

- Up to a 25% reduction in Overtime Hours.
- Up to a 36% reduction in Average Queue Time.
- Up to a 12% reduction in WFM Admin. Hours.
- Up to a 7% reduction in Payroll Cost Per Hour of Handle Time.
- Up to a 10% increase in Forecasting Accuracy.
- Up to a 24% increase in Total Calls Answered.

*Results shown are based on previous customer performance. Your results may vary.

In fact, most of our customers see sufficient cost savings and productivity gains to pay for their Pipkins' systems well within the first year after implementation.

When you work with Pipkins, you benefit from an agile partner focused on delivering the accurate workforce management solutions you need. We are dedicated to providing prompt, dependable service and continuously evolving to meet our customers' changing needs.

WorkForce Network™

Changing WFM Forever!

Our new workforce management suite will help you control costs and improve the performance and productivity of your contact center agents, their supervisors and other members of your staff – Bank on it!

Planning is made easy with the most accurate forecasting tool available today. Powerful staffing features provide the necessary capability to optimize staffing levels and scheduling.

Intraday adherence monitoring and schedule editing tools provide the ability to optimize performance and efficiency by making adjustments on the fly.

Pipkins' WorkForce Network provides a holistic management system for Contact Center and Enterprise workforce environments. The cyclical process includes Planning with forecasting, requirements and scheduling tools as well as, vendor resource management functionality.

Intraday systems feature task tracking data collection with real time adherence and performance monitoring to optimize schedules and maximize production and/or service percentages.

Analysis of completed schedules and staff performance can be done with a single source of data feeding spreadsheet reporting in customized formats to meet specific needs.

The suite also includes fully integrated tools for compliance monitoring of screens and cameras, mentoring and collaboration, so all team members and supervisors stay connected and fully engaged.

Vantage Point™

Using our proprietary algorithms, Vantage Point can help you generate the accurate workload forecasts and the optimal staff schedules you need, so you have the right mix of people with the right skills available at the right times to achieve your required service levels. Accurate forecasting and scheduling are key factors in your efforts to maximize productivity and control costs.

***Accurate workload forecasts
... optimal staff schedules***

intelliTRACK™

IntelliTRACK provides time and attendance tracking, as well as superior, real-time task tracking data collection for all non-phone related activities. This task tracking data can then be used for forecasting and scheduling staff throughout your organization, as well as for your ongoing resource optimization efforts. Data from IntelliTRACK can also generate payroll timesheets for our Work Confirmation tool which then links to your payroll system, streamlining your payroll process.

intelliVIEW™

IntelliVIEW is Pipkins' new monitoring, mentoring and collaboration tool. It allows supervisors to monitor the screens and cameras of team members. It also features video conferencing and instant messaging for quick and easy ways for managers, supervisors and team members to communicate, and screen sharing for mentoring and collaboration. It's ideal for managing remote or at-home workers and is fully integrated within your Pipkins' workforce management suite.

eSmart™

With eSMART, you can see everything, know everything and take action right away, giving you and your teams the flexibility and agility to maintain optimal staffing levels and peak productivity during intraday. We've streamlined schedule management and adherence monitoring, consolidating your staff's schedules, actuals and deviation information all on one screen. Plus, Intelligent Editing and Automated Editing can significantly reduce supervisory and/or administrative time previously devoted to schedule edits and adjustments.

Spreadsheet Reporting Module

Pipkins' Spreadsheet Reporting Module provides the power to consolidate real-time performance data into customizable reporting and dashboards so you can get the actionable data you need to move the needle. The performance of agent, team, and group metrics can be quickly delivered to every level of organizations from the front office contact center to the back office to the executive suite by utilizing Key Performance Indicators (KPIs).

IntelliTRACK™

Pipkins' cloud based task tracking solution provides accurate data collection for use by your entire workforce, including at-home agents and other off-site or remote workers.

The screenshot displays the IntelliTRACK software interface. It features a sidebar with navigation options like 'Active', 'History', and 'Summary'. The main area shows a list of activities with columns for Activity, Identifier, Start, End, and Duration. A 'Summary' panel on the right provides a breakdown of task tracking data, including a table with columns for Activity, Count, Total Duration, and Avg Handling Time.

Activity	Count	Total Duration	Avg Handling Time

BETTER TASK TRACKING

Your entire workforce can log start and end times of the tasks they perform, as they perform them, in real time on their work station, smart phone or tablet.

IMPROVED FORECASTING

With better task tracking comes more accurate Average Handle Time data which in turn will improve your overall WFM forecasting accuracy.

RESOURCE OPTIMIZATION

Understanding the productivity of your workers will also aid in optimizing your total resource usage, and in planning when scaling operations up/down.

Forget about the standard time clock apps you've used. Retire those old-fashioned physical time clocks at the entrances to your facilities, if you still have them. IntelliTRACK does much more ...

POWERFUL TIME MANAGEMENT TOOLS

1

Task Tracking Data Collection

IntelliTRACK™ provides superior task tracking data collection. Detail and summary reporting enables users to see performance data in real-time.

Average Handling Time and total tasks handled provided data for productivity percentage for each team member, work group, etc.

2

Adherence Monitoring

eSMART™ allows adherence monitoring for intraday task tracking for each agent using IntelliTRACK™. Each agent's performance and adherence can be evaluated and any necessary adjustments, mentoring or assistance can be identified and implemented quickly and efficiently.

3

Productivity Reporting

IntelliTRACK™ data reporting is easily produced in the desired format with Pipkins Spreadsheet Reporting Module. Production hours, completed tasks and average handling time calculations insure accurate data for forecasting and scheduling needs.

Work Confirmation

Agent to Supervisor schedule confirmation and approval

Data Collection via intelliTRACK™

The time, attendance and task tracking data logged in IntelliTRACK are used to generate payroll timesheets within the Work Confirmation tool. Billable hours can be tracked and charged to specific projects, departments or clients as you require.

Timesheet Review and Approval

Workers use SwiftPik™ or SwiftPik Mobile™ to review and submit their timesheets. Supervisors review and approve timesheets for their team members from within Work Confirmation. The process is quick and easy and doesn't require either the workers or their supervisors to log into a standalone payroll platform. The entire submission, review and approval process happens within our cloud-hosted workforce management platform, the same WFM system they use throughout every workday.

Payroll Integration

Pipkins' Work Confirmation integrates with ADP® and other payroll systems to streamline processes for your payroll and/or accounting teams. This integration also eliminates the risks of errors from having to manually input data into your payroll system. Compliance functions such as pay/hours dispute resolution, auditing, etc. are also simplified and streamlined.

The screenshot shows the 'Admin Confirmation' page in the Pipelines Admin Console. The page has a dark sidebar on the left with navigation links like 'Overview', 'Pipelines', 'Jobs', 'Runs', 'Logs', 'Alerts', 'Settings', and 'Help'. The main content area is titled 'Admin Confirmation' and shows a table of pipeline runs. The table has columns for 'ID', 'Name', 'User', 'Status', 'Error', 'Warnings', 'Created At', 'Updated At', and 'Actions'. The table contains 10 rows of data, each representing a pipeline run. The 'Status' column shows various states like 'Running', 'Completed', 'Failed', and 'Cancelled'. The 'Error' column shows error messages for failed runs. The 'Warnings' column shows warning messages for runs with warnings. The 'Actions' column contains links for 'View', 'Cancel', and 'Restart'.

ID	Name	User	Status	Error	Warnings	Created At	Updated At	Actions
1	pipeline-1	admin	Running			2023-10-27 10:00:00	2023-10-27 10:00:00	View Cancel Restart
2	pipeline-2	admin	Completed			2023-10-27 10:01:00	2023-10-27 10:01:00	View Cancel Restart
3	pipeline-3	admin	Failed	Error: pipeline failed		2023-10-27 10:02:00	2023-10-27 10:02:00	View Cancel Restart
4	pipeline-4	admin	Cancelled			2023-10-27 10:03:00	2023-10-27 10:03:00	View Cancel Restart
5	pipeline-5	admin	Running			2023-10-27 10:04:00	2023-10-27 10:04:00	View Cancel Restart
6	pipeline-6	admin	Completed			2023-10-27 10:05:00	2023-10-27 10:05:00	View Cancel Restart
7	pipeline-7	admin	Failed	Error: pipeline failed		2023-10-27 10:06:00	2023-10-27 10:06:00	View Cancel Restart
8	pipeline-8	admin	Cancelled			2023-10-27 10:07:00	2023-10-27 10:07:00	View Cancel Restart
9	pipeline-9	admin	Running			2023-10-27 10:08:00	2023-10-27 10:08:00	View Cancel Restart
10	pipeline-10	admin	Completed			2023-10-27 10:09:00	2023-10-27 10:09:00	View Cancel Restart

Staff Schedules

Work Confirmation supervisor screen provides a list of each staff member's weekly schedule summary, including:

- First and Last Name
- Employee ID
- Regular Hours
- Overtime Hours
- Total Hours
- Schedule Status
- Agent Comments

Schedule Editing

Editing capability through eSmart™ technology provides an easy solution for reconciling and confirming each agents schedule in preparation for payroll.

- **Confirmed, Disputed and Grievance Status'**
- **Schedule Detail Editing Capability**
- **Approve For Payment**

[illegible]

Payroll Process

Work Confirmation allows user with payroll processing rights to modify approved for pay schedules.

- Bonus Additions
- Commission Payment
- Payroll Adjustments
- Other Configurable Capabilities

VACATION PLANNING

Use of a vacation planning system will make the life of your workforce manager and front-line supervisors much easier. It also boosts agent satisfaction and reduces carry-over, while allowing you to streamline and automate much of the process with vacation bidding rules and groups based on skill sets.

OVERTIME REQUESTS

Overtime requests and bidding processes can also be automated via an overtime planning tool empowering agents to take control of their work lives, boost morale, improve the efficiency of your operations, reduce administrative costs, etc.

Enabling workers to easily access information about current schedules, vacation time and overtime requests

Self-Scheduling Planning Schedule

Agents and other workers can view their own schedules, as well as set their own schedules within the parameters set by their workforce manager and approved by your management team. These parameters can include seniority, overtime, location, qualifications and training and other customizable rules to fit your specific business requirements.

Vacation Planning Time Off Records

Your staff can view their accrued vacation time and other paid time off (PTO), as well as used and scheduled vacation time. They can also submit vacation requests. Your workforce manager defines parameters for vacation planning, creates vacation groups based on skill sets, allocates slot limits for each vacation group, etc., so you always have the coverage to handle your expected workloads.

Overtime Requests Submit Requests

Gain the flexibility to manage change on both an intraday basis and throughout the entire year, so you can adjust your staffing to match higher workload levels, or compensate for staff that may be out sick or on vacation. Overtime planning parameters and bidding rules are set by the workforce manager. Daily available overtime slots can be forecast by staff group.

SwiftPik
by PIPKINS, Inc.

Introducing Pipkins® mobile application. We're taking Mobile WFM to a whole new level.

SwiftPik™ for iOS represents the next stage in the evolution of Mobile Workforce Management — an app-based solution tailored for the mobile environment that puts the power of Pipkins' WFM tools at your fingertips wherever you go. All you need is your iPhone® or

iPad® and internet access to join your Workforce Network™.

- **Advanced Time Clock**
- **Scheduling Power**
- **Vacation Planning**
- **Send Alerts**
- **and much more!**

Available on the Apple App Store®.

eSMART™ Desktop

How much supervisory time and WFM administrative time is spent on schedule management and adherence monitoring? Agent self-scheduling, shift-bidding and vacation planning can and do improve agent engagement, and increase supervisor productivity, while reducing workforce management administrative hours. However, that's just a starting point.

With our newest WFM tools and their enhanced automation and integration, all levels of your organization can be better connected and more effective, while reducing costs and increasing profits.

With eSMART, you can see everything, know everything and take action right away, giving you and your teams the flexibility and agility to maintain optimal staffing levels and peak productivity in today's fast-paced, ever-changing, omni-channel contact center environments.

We've streamlined schedule management and adherence monitoring, consolidating your staff's schedules, actuals and deviation information all on one screen. Intelligent Editing and Automated Editing can significantly reduce supervisory and/or administrative time previously devoted to schedule edits and adjustments.

eSMART™ Desktop

Schedule management and adherence monitoring

Schedule Editing

Intraday schedule editing allows optimized staffing throughout the shift with powerful tools including: trim, insert, extend, cut/paste, copy/paste, lift, overwrite and re-optimize to name a few. Schedule management has never been so convenient.

Adherence Monitoring

Staff member's schedule adherence is available at a glance, in real-time, to provide awareness of each staff member's adherence to schedule. Supervisors can now monitor staff adherence and base schedule edits on real-time adherence data.

Intelligent Editing

Schedule adjustments can be made with assurance that proper adjustments for breaks and meals will be accounted for automatically. Intelligent Editing minimizes time consuming schedule edits for the supervisor or administrator.

Automated Editing

eSMART Desktop provides automated editing capability such as adjustments for late or early start times, failure to properly clock out of the IntelliTRACK system, or "no call, no show" occurrences. These automated tasks reduce supervisor interaction.

Automated Scheduling

eSMART provides automated scheduling for those employees who are scheduled by shift duration rather than a scheduled start and end time. A schedule is inserted for the proper shift duration when the employee clocks in. Breaks and lunch are automatically inserted, when taken.

Real-Time Deviation Report

Real-time deviation reporting provides staffing surplus or shortage information at any point during the shift so that adjustments can be made to optimize the schedule for a higher productivity percentage and scheduling efficiency.

Vantage Point™

The power of Vantage Point

Vantage Point is Pipkins' premier enterprise workforce management solution, featuring comprehensive scheduling, forecasting, and planning functionality for complete enterprise-wide, front office, back office, multi-site, contact center workforce management and performance management.

With our exclusive, state-of-the-art forecasting and scheduling algorithms, Vantage Point can help you solve complex operational issues in today's multifaceted omni-channel contact center and back office environments, automate processes and reduce costs.

POWERFUL FORECASTING

SCHEDULING POWER

Improved forecasting and scheduling accuracy will help you significantly boost productivity while also lowering your costs. That means more money goes to your bottom line as profit.

But that's not all. Improving the efficiency and effectiveness of all your teams also contributes to higher customer satisfaction and higher team morale.

Growing profits, higher customer retention and lower staff turnover ... That's a win-win-win!

The Accurate Workforce Management Solution.

The Big Picture

With Vantage Point, you will have a proven WFM solution that can help you automate processes, lower costs and positively impact your organization thru:

- **Higher, more consistent levels of service**
- **Higher customer satisfaction**
- **Increased profit margins**
- **Higher team morale**
- **Lower stress levels team-wide.**

Forecasting

Using true forecasting techniques, with our proprietary algorithms that include curve mapping and pattern recognition, the Pipkins forecaster intelligently analyzes your historical data and selects the most appropriate method to provide the most accurate and realistic forecast possible for all your contact center and back office operations.

Scheduling

Using an integrated approach, without resorting to separate modular functionality to support multi-skilled issues, Vantage Point's scheduling technology provides the advanced capabilities necessary for multimedia and skill-based routing environments. With an optimum scheduling solution, you can easily meet your service objectives and operate more cost effectively.

Performance Mgmt. Reporting

The Pipkins Performance Management Reporting Module for Vantage Point provides the ultimate flexibility in Workforce Management reporting. You can report on virtually all contact center data in Vantage Point the way you want using your own custom spreadsheet templates.

Real-Time Adherence

The best way to achieve maximum productivity in a contact center is to have a timely and accurate snapshot of agent activities so you can quickly make adjustments and improvements. Vantage Point offers 3 distinct ways for organizations to monitor agent adherence and improve performance and productivity as a result.

Notifications

Vantage Point includes a comprehensive information dissemination system that allows easy transfer of data to your agents via immediate, scheduled, recurring, or automated notifications. Notifications can be delivered via email or screen popup, and can be broadcast to all agents, or to individual agents.

To learn more about our powerful WFM tools, request a demo today!

IntelliVIEW™

Monitoring, Mentoring and Collaboration

Screen Sharing for Mentoring and Collaboration

Work together just like you are sitting side by side, no matter whether you are five cubicles away from each other or 5,000 miles apart. Ideal to explain specific tasks to new employees or when you need to collaborate on projects.

Multi-Station Video Conferencing

Meet with one member of your team for one-on-one discussions or call a group meeting. No need to send calendar invites. You can initiate a meeting as soon as you see that all team members are available in their daily schedules when quick communication is needed, or you can schedule your video conferences in advance, all within our WFM suite.

Instant Messaging

Forget about standalone IM apps. Workers and supervisors can send messages to each other for quick, efficient communication.

Stay Connected & Fully Engaged

Ideal for managing at-home agents and other remote workers

Monitoring of Camera & Screen

With IntelliVIEW and its video and screen-sharing capabilities, you can monitor workers in real time to ensure that they are performing at expected levels and are in full compliance with all your requirements. When used for mentoring, supervisors, trainers or senior coworkers can then give immediate feedback to assist in improving performance.

Recording from Camera & Screen

Use recordings to document performance and for mentoring your team members. Record your top performers and show those recording to your entire team as examples of "how it should be done." Use recordings of lower performers as examples of "what not to do" and to explain how to do it better. Record all team members so you can use those recordings in your one-on-one mentoring sessions.

*future functionality

Video Interviewing

Enhance your recruiting efforts through using video interviews. Replace initial phone interviews with video interviews, so you can better evaluate each prospective employee at this first stage in the interview process. You may even be able to eliminate the need for the in-person interview by opting for video interviews instead, helping to streamline your hiring process via HomeBoarding™.

Time & Attendance Verification

Record a photo from the camera at clock-in and clock-out for time and attendance verification.

*future functionality

Virtual Water Cooler/Lunch Room

Allow staff to socialize via video conferencing during breaks and meals no matter where they work.

*future functionality

Data Centers -- *Cloud-Hosted Solutions*

Pipkins' hosted or cloud-based solutions utilize a single server, architecture, and platform which allows access anywhere, anytime. Organizations benefit from our enterprise software without high up-front licensing costs, IT expenditures, etc. Our hosted solutions offer a quick return on investment as well as the benefits of Pipkins' proven technology.

WebAccess is a flexible subscription based solution provided through a secure SOC2 Type II data center. Security is ensured through web-based or mobile login access. WebAccess offers the following benefits:

- No hardware or software to install
- Flexible month-to-month subscription costs
- Operating expense as opposed to large capital expenditure
- Access anytime, anywhere with no "VPN" requirement
- Peace of mind, we manage it for you
- Enterprise software capabilities at a much lower cost
- Fast implementation process

Pipkins is the only hosted offering for workforce and performance management, as well as back office management capabilities, on a single database. Our hosted solutions give companies real-time visibility and process automation without the high capital expenditures and IT costs required by many other workforce management vendors.

Pipkins currently operates three data centers for our cloud-based solutions. Two are located in the U.S. in Dallas and Houston. The third is in the U.K. in London. All are in SOC2 Type II data center campuses and use hyper-converged infrastructure for superior redundancy running on Windows Server 2016.

Industries Served

Pipkins has an installed base of workforce management (WFM) solutions in a wide variety of industries around the globe. The industries we serve include:

- **Broadcasting/Cable Television**
- **Business and Professional Services**
- **Business Process Outsourcing**
- **Distribution**
- **Education**
- **Financial Services**
- **Government**
- **Healthcare**
- **Information Services**
- **Insurance**
- **Manufacturing**
- **Nonprofits**
- **Nutrition/Food & Beverage**
- **Petroleum**
- **Public Utilities**
- **Publishing**
- **Retail**
- **Staffing**

- **Telecommunications**
- **Telemarketing**
- **Transportation/Shipping**
- **Travel/Hospitality**
- **Warehousing/Storage**
